

# Informational Bulletin

## E-ZPass Transponders

Date: April 8, 2024

Number: 24.023

Effective Date: April 8, 2024

Expiration Date: N/A

Approved By: Kalvyn W. Smith, Fire Rescue Chief

With the frequency in which we are responding and traveling through Northern Virginia, it was decided that E-ZPass transponders should be installed in all system ambulances. Logistics will be coming around to install these transponders over the next couple of weeks.

These transponders will allow our system units to travel in the HOT (High Occupancy Tolling) lanes. These lanes are there as an alternative to HOV lanes. It will take a few weeks for our vehicle list to be approved by the HOT lane companies, so we ask that you please refrain from using these lanes until the first week of May for non-emergent responses.

Questions regarding this informational bulletin should be directed to Battalion Chief McEvilly.
